

Oncology at Worldwide Clinical Trials

Worldwide Clinical Trials (Worldwide) is a leading full-service global contract research organization (CRO) that offers innovative end-to-end customized solutions in partnership with biotechnology and pharmaceutical companies.

Founded on an unwavering commitment to therapeutic excellence and personalized attention, we bring scientific expertise, a specialized and flexible oncology team, and a shared passion for advancing new medicines from discovery to reality.

Full-Service Experience at a Glance

19,942+
Enrolled Patients

3,108+
Clinical Sites

34+
Countries

20%
Rare Oncology

All Regions

Expertise dedicated to accelerating clinical trial approvals in:

- Immuno-oncology
- Large and small molecules
- Cell and gene therapies
- Rare oncology
- Radiopharmaceuticals
- Adaptive design (BOIN, CRM, 3+3)
- Master protocols (basket & umbrella designs)

Why is Worldwide right for your oncology study?

- You can find our experienced oncology teams on the ground across the globe, accessible and ready to help you no matter where you are
- With our oncology team's high retention rate, our sponsors can trust in the stability of their study
- Preferred site partnerships through our Site Alliance Collaboration
- Expertise in adaptive trial design methodology from protocol design through data collection and analysis

Regulatory Expertise

- Our teams are worldwide, offering local regulatory expertise and operational support to deliver global clinical studies
- Drug development team acts on both study design and regulatory logistics, balancing submission requirements and interactions with regulatory authorities
- Shape project plans to meet diverse regulatory requirements
- Experienced in the logistical and process requirements of the EU-CTR filing and approvals

Patient Enrollment & Site Engagement

- Before protocol finalization, we recommend engaging with PIs through our Site Alliance Collaboration to review and provide feedback
- Comprehensive site portfolio to support diverse patient enrollment and increased patient access to clinical trials
- Clinical Trials Liaisons and Clinical Enrollment Managers for additional support for oncology centers

[Learn more about our Site Alliance Collaboration](#) →

Our project teams hold a depth of indication- and phase-specific experience, providing accessible expertise and flexible service delivery. All our sponsors receive a project manager based in their area and have direct access to our executives for additional support and engagement.
