

# Worldwide's Nephrology Experience

**48**  
Countries

**8,900+**  
Patients

**550+**  
Unique Sites

## Broad individual and combined team experience across multiple indications in both common and rare renal disorders

- Lupus nephritis, kidney disease, C3 glomerulonephritis, IgA nephropathy, FSGS, diabetic nephropathy, HUS, metastatic renal cell carcinoma, polycystic kidney disease, primary hyperoxaluria type I, and XLH

## Differentiated Scientific Service Offerings

- Portfolio evaluation, clinical development plans, and synopsis/protocol development
- KOL engagement and regulatory meeting support (FDA/EMA/MHRA)
- Expertise in FastTrack, Breakthrough, Orphan Drug, and RPDD designation strategies

## Clinical Trial Technology and Other Core Services for Nephrology

- Established collaborations with specialized service providers
  - Central Laboratory
  - Bioanalytical Labs (PK/PD, Biomarkers)
  - Renal Pathology
    - Light microscopy
    - Electron microscopy
    - Immunofluorescence
  - Imaging (MRI & ultrasound)
  - ePRO & eCOA
  - Home Health
- Scale & PRO management, identification, & procurement
- Rater training and experience assessment

## Subject Toolkit and Logistics

- Detailed video instructions for urine collection procedures
- Male/female collection containers and cooler backpacks for confidential sample transport
- Home urine sample pickup organized where possible

## Study Delivery | Enrollment Strategy

- Site selection based on indication experience and patient access
- Global site network and patient advocacy group support
- Cross-border enrollment, travel concierge services, and patient navigators

## Expert Renal Endpoints: Experienced Clinical and Medical Team

- 24-hr Urine Collections
- First Morning Void Urine Collection
- Urine Protein Creatinine Ratio (UPCR)
- Urine Albumin Creatinine Ratio (UACR)
- Glomerular Filtration Rate (GFR)
- Total Kidney Volume (TKV)
- Height-adjusted TKV (HtTKV)
- Kidney Biopsies
- Disease-specific Patient-reported Endpoints

## Patient Advocacy Groups & Investigator Networks

- Collaborations with indication-specific investigator networks for site accrual
- Partnerships with patient advocacy groups to support education, study awareness, referrals, and enrollment

## Extensive Global Nephrology Network

- 550+ unique nephrology sites across 48 countries
- Over 50% of sites involved in repeat studies
- Strong presence in North America, Europe, Asia-Pacific, and South/Latin America
